HOMEWORK: BURGER

Technology: node.js, express, mySQL, handlebars and ORM

INTRODUCTION:

- EAT THE BEST BURGER EVER is is a restaurant app that lets users input the names of burgers they'd like to eat.

- Whenever a user submits a burger's name, your app will display the burger on the left side of the page -- waiting to be eaten.

- Each burger in the waiting area also has a `Eat it!` button. When the user clicks it, the burger will move to the right side of the page.

- Your app will store every burger in a database, whether eaten or not.

APP SETUP:

1- To run locally in your machine, install:
   Note: Instructions you have node.js installed; otherwise, download it.

   - `npm init -y`

   - `npm install`

   - Express npm package: `npm install express`

   - Handlebars npm package: `npm install express-handlebars`

   - body-parser npm package: `npm install body-parser`

   - MySQL npm package: `npm install mysql`

   - Method-override npm package: `npm install method-override`

2- Go to config folder and type your mysql password in the 2 files

3- Start your server and MySQL workbench and run comments as per screenshot #1 and #2 below to:
   a. create burger_db database
   b. create burgers table
   c. populate the table

4- Now run npm start or node server.js on the command line

5- Open your browser to localhost:3000 and you will see EAT THE BEST BURGER EVER app! (screenshot #3 below)

SCREENSHOTS:

SCREENSHOT 1:

- Shows below the database set up on mySQL workbench. Includes "burgers_db" database and table "burgers"

SCREENSHOT 2:

- Shows below the database seeded
